- Weighing tickets with graphics (BauPVO)
- Performance overviews of the scales (monitoring)

## **i** Quick Overview

### Maximum Accessibility

The PFREUNDT Web Portal is comfortable access to your weighing data when and where you want. Whether in the office, on your PC or from your smartphone and tablet when you're on the road. Your data is ready for you 24 hours a day, 7 days a week.

### High level of comfort

The PFREUNDT Web Portal is the innovative internet software for automatic data exchange with your mobile PFREUNDT scales. As a user you always have complete control of your data. The portal makes individual evaluation functions, as well as modern interfaces for continued processing in your own systems, available to you.

### Greatest Security

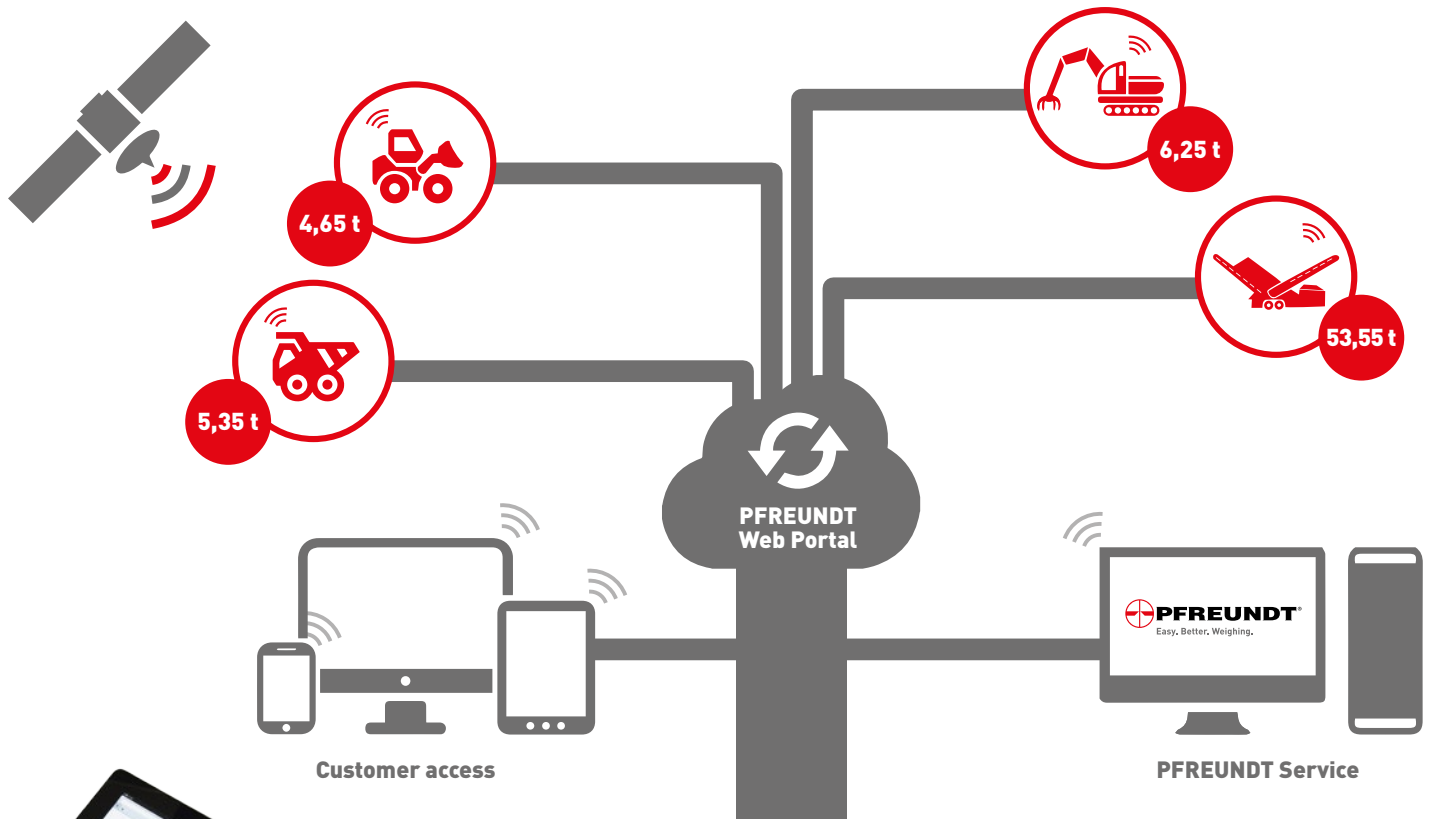

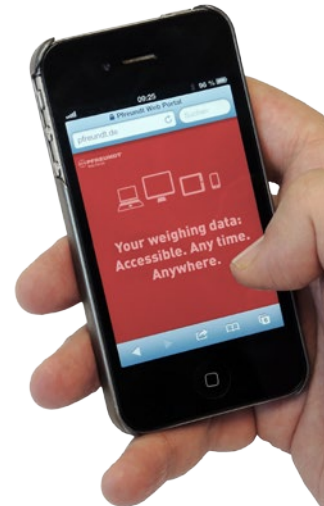

You can easily access all the functions of the PFREUNDT Web Portal using your web browser without installing additional software. The software has a high security standard, does not need to be maintained and is always ready for you in its most up-to-date version.
