Save time and money

PFREUNDT – weighing technology for the mining industry

Forward-looking weighing technologies for loading, transport and digital process solutions – weighing becomes very easy

Robust, durable and effective – you can rely on the innovative PFREUNDT scales. Because reliable and precise scales are indispensable for the diverse requirements of material weighing in the mining industry. Whether check weighing or calibration weighing for a legally binding trading: With the economic and sustainable PFREUNDT solutions, you are optimally equipped. Including for future challenges.

Anyone who works hard every day should have it easy when weighing. With the sophisticated PFREUNDT solutions, you can complete weighing tasks faster and easier. As pioneers of mobile weighing technology, PFREUNDT knows exactly what is important in quarries, gravel pits, etc.: Saving time and costs, ease of use, as well as robustness and reliability of the devices.

PFREUNDT WK60 series

Flexible, future-proof, manufacturer-independent and calibratable – because your investment should pay off

For simple, precise and effective weighing, the WK60 series is available in various versions, such as WK60-XS, WK60-Smart, WK60-S and WK60. All versions already offer a wide range of options in the basic configuration and thanks to the many additional features they can be adapted to special requirements and operating procedures at any time. For the digital processing of your weighing data, all scales of the WK60 series are equipped with WLAN and can be directly connected to the PFREUNDT Web Portal, therefore. The scales can easily be installed or retrofitted in various manufacturer vehicles of your machine park.

PFREUNDT wheel loader scales

Profit by the bucket

The PFREUNDT wheel loader scales have been fitted with practical features for faster processing, more efficient loading and maximum capacity.

Advantages for you

- Calibratable and PFREUNDT conformity assessed, your scales are directly ready for business use.
- Comprehensive and customisable master data and weighing data management guarantee you easy and fast dispatch.
- Future-proof data communication creates full transparency of your weighing data, e.g. in the PFREUNDT Web Portal.

Weigh even faster and easier with Speed Weigh Technology (SWT): Digital angle sensors allow an expansion of the previous measuring range. The weight is already displayed after a short lift.

With networked weighing data acquisition across the entire process chain, your company is prepared for the future. Further information about PFREUNDT system solutions can be found on pages 10 and 11.

Further information on equipment and accessories:
www.pfreundt.de/en/products/wheel-loader-scale/

PFREUNDT dumper scales

The right weighing solution for any dumper

With the scales for articulated and rigid-frame dumpers PFREUNDT offers you the perfect weighing solution for every type. The weight is determined on the one hand during unloading by pressure sensors via the working pressure in the tipping hydraulics and on the other hand during loading using measuring elements on the rear axles.

Advantages for you

- Optimum capacity utilisation
- Registration of overloads
- Weight checks
- Exact activity recording

Technical details and information on the extensive range of accessories for dumper scales can be found on our website:
www.pfreundt.de/en/products/dumper-scale/

PFREUNDT belt scales

Precise weighing data in mobile and stationary systems

PFREUNDT offers you belt scales for installation in stationary systems, as well as in mobile screening and crushing plants. Due to the special construction, with a very low installation height, the belt scales can be easily integrated into your existing conveyor belts.

Advantages for you

- One electronic assembly for several belts
- Integrated belt speed measurement
- Can be integrated into your plant control system
- Storage, processing and transfer of your master data and weighing data
- Inclination measuring system for correction calculation of changing discharge angles

Technical details and information on the extensive range of accessories for belt scales can be found on our website:
www.pfreundt.de/en/products/belt-scale/

PFREUNDT weighbridges

Highest measuring accuracy and perfect service

In addition to complete weighbridges for installation at ground level, PFREUNDT offers you surface-mounted vehicle scales for above-ground installation in various lengths, as well as steel and concrete versions. PFREUNDT develops the ideal solution for your weighbridges according to your requirements and the conditions on site. From advice from assembly to commissioning with conformity assessment and software connection, you get everything from one source.

Advantages for you

- Little preparation for installation
- Quick installation of the complete scale
- Optimised cleaning and maintenance options

You can order various peripheral devices such as traffic light control, large displays, barrier system or software connection. References for networked weighing data acquisition over the entire work process can be found at:
www.pfreundt.de/youtube/

PFREUNDT system solutions

We prepare you for the future:
With the networked recording of weighing data
across the entire process chain

From standard solutions through complex system solutions to individual solutions for your entire operational process – everything is possible. Thanks to our many years of experience, we know exactly what matters and make it easy for you. So you can be sure that PFREUNDT will develop the best weighing solution for your company.

Your advantages

- Faster dispatch means more sold quantity per day for you
- Digital processes ensure fast invoicing
- Fewer manual activities lower your operating costs
- Full transparency of your weighing data gives you more planning security
- Sustainable management reduces your CO₂ emissions

Our services

Need

Together with you, we take the current processes and procedures in your company into account and develop the appropriate concept for your weighing solution.

Implementation

We install all components and put your weighing system solution into operation.

Support

We will ensure that your plant operates trouble-free at all times.

Process flow reference project at our customer RBS

100%
transparency

Check-in
The truck driver receives an RFID card to store the weighing data.

Loading
A wheel loader with PFREUNDT WK60 weighing system loads and records the weighing data.

Storage of weighing data
The weighing data is stored on the RFID card by a sensor on the wheel loader.

Terminal
After loading and before exit, the RFID card is read at the self-service terminal.

Check-out
The driver signs the weighing data and prints the delivery note.

PFREUNDT Web Portal

Digital weighing data – available in real time

The PFREUNDT Web Portal makes it easy for you to manage your weighing data, optimises your load management and thus increases your efficiency:

- Minimises costs
- Optimises processes
- Recognises potentials
- Increases quality
- Increases productivity
- Secures sustainability

The digitisation of your weighing data and processes is advisable for the following reasons:

- All production and sales figures at a glance and always up-to-date
- A multitude of functionalities to control your flow of goods
- Individual evaluation options as a basis for decision-making – including automated email dispatch of generated reports
- Latest technology for creating delivery notes and documents in your system
- Highest data security through encrypted data exchange and state-of-the-art server technology in accordance with corresponding data protection guidelines

Make your day-to-day business easier and increase your planning security

Dashboard:
All data and information at a glance

Weighing data:
With the filter function you have all data under control

PFREUNDT service

We are at your disposal

PFREUNDT stands for top performance – not only in products, but also in service. Our comprehensive service network with our own assembly teams ensures installation and retrofitting, as well as smooth and uninterrupted operation of your weighing systems.

Hotline support

Friendly, competent, solution-oriented – real experts. PFREUNDT support staff are very familiar with all scales and accessories, allowing them to provide you with expert advice over the phone.

Calibration service

All appointments with you and the calibration office are planned and coordinated by our staff of the calibration service. The PFREUNDT calibration vehicle comes to you with calibration weights and hoists. Experienced service technicians carry out the readjustments and calibrations directly on site.

Application advice

Our application consultants ensure that you always work with the most efficient solution. Material, quantity and equipment determine the optimal equipment for your needs.

“We are proud to be the only company in this industry that offers service on this scale!”

PFREUNDT

The pioneers of mobile weighing technology

Innovative technology – now and in the future

For 40 years, everything at PFREUNDT has revolved around optimum weight determination. We have always aimed to simplify the elaborated, time-consuming processes involved in weight determination and to make the processes simpler, more precise and more transparent. We think ahead for you – and already develop today the solutions for tomorrow's needs. PFREUNDT innovations are pioneering in the industry.

Our milestones in the industry

- 1984 WK25 – first calibration approval for a mobile scale in a wheel loader
- 1994 First belt scale for mobile crushing plants with inclination compensation
- 1998 WK50 – first mobile scale with patented dot-matrix printer for printing a multi-line weighing card
- 2010 pSeries – first mobile scale with rotary wheel operation and camera monitor
- 2015 WK60 – first mobile scale with touch display and connection to the PFREUNDT Web Portal

Weighing system solutions "Made in Germany"

Our high quality standards are implemented from the incoming goods inspection through to production. In addition, we hire employees with many years of experience, train junior staff and continuously invest in qualification measures. Marking and documentation of all scales is just as obvious for us as strict quality controls. This ensures that all information is transparent to you at all times.

We are at your disposal – worldwide

Personal service is guaranteed by PFREUNDT. With our worldwide service and sales network, you always have a competent contact person on site. For all service, consulting or sales questions.
