PFREUNDT Web Portal – when it comes to digital processing of weighing data

More transparency
Full transparency of all goods flows in your day-to-day business

Optimised planning
Best utilisation of your vehicle fleet and team

Real-time data
All weighing data instantly on your computer, tablet or smartphone

Reduce costs
Fewer manual activities also mean fewer errors

Save time
Data are immediately available e.g. for your invoicing

Recognising potentials
Individual analyses and reports as a basis for your decisions

The PFREUNDT Web Portal makes it easy for you to manage your weighing data, thus increasing your efficiency. The data are transferred directly from the PFREUNDT weighing systems in the construction machinery and vehicles and are immediately available for further processing and evaluation.

Weighing 4.0: Staying prepared for the future through digitisation

The PFREUNDT Web Portal – independent and flexible

No matter what type of construction machine or vehicle you are using, in the PFREUNDT Web Portal you have all data such as weight, material, date, location, etc. available at a glance in real time. And the connection to your software for further processing of the data is just as flexible and simple. From the web platform, without installation and update effort from your side, up to complete integration into your systems – everything is possible.

Interfaces

In addition to modern automated interfaces, we also offer PDF and Excel exports for manual processing of the data generated.

Connections

Flexible options for your requirements:
- As an online platform
- Via the online platform directly into your ERP system (ERP-API interface)
- Via a customisation software in your ERP system (CSV, Excel, TXT files)
- Via the online platform directly into your pOffice

Your ERP system

Your current weighing data

Your master data

Your prepared weighing data

PFREUNDT® Web Portal

"We are constantly developing our Web Portal further so that our customers continue to be ready for the future – this is very important to me personally."

André Groeters
Application Consultant and Web Portal Specialist
at PFREUNDT

Anytime and anywhere

As a browser-based platform, the PFREUNDT Web Portal offers maximum data availability at any time from anywhere and for all terminal devices.
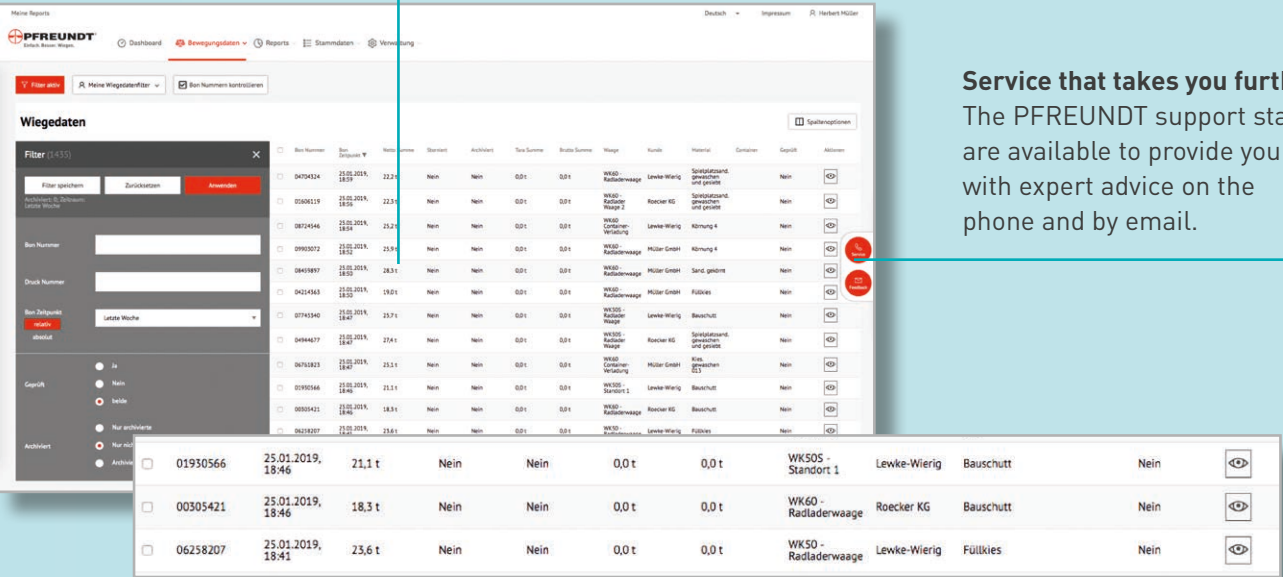

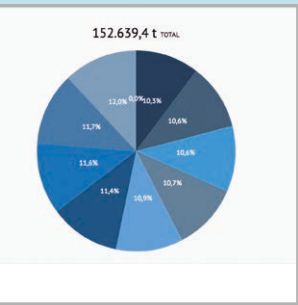

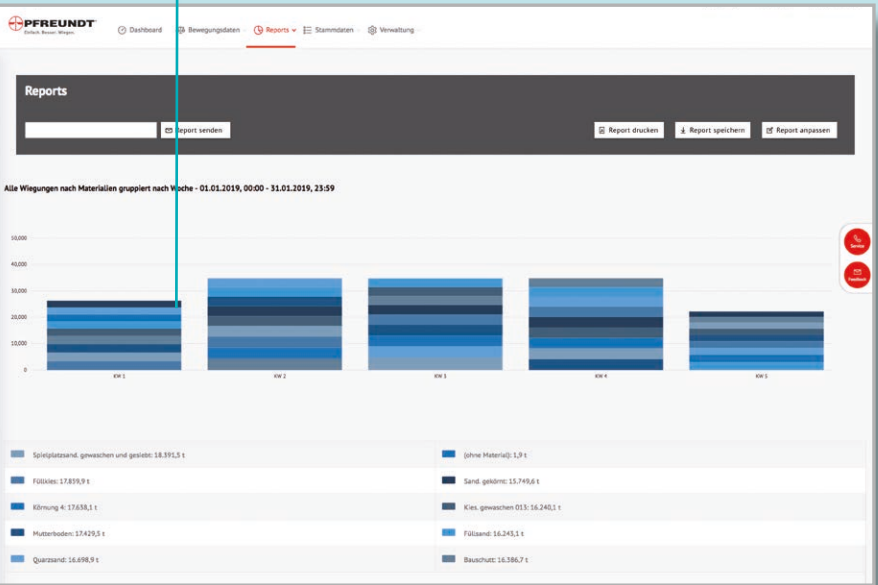

Highest data security

We guarantee the highest level of data security in compliance with the latest data protection guidelines through encrypted data exchange and state-of-the-art server technologies. Our servers are located in certified German data centres.

A clear dashboard
You receive all important information directly at a glance and can therefore react immediately.

Transaction data in real time
The current weighings of your weighing systems are displayed directly and clearly.

Separate material overview
The materials processed in a period you have specified are displayed in a pie chart.

Location information
With the latest location information, you always know where your machines and vehicles with the weighing systems are located.

Easy capacity planning
The precise and clear presentation of your storage capacities makes efficient planning very easy.

Transaction data in real time
As a browser-based platform, the PFREUNDT Web Portal offers maximum data availability from anywhere and for all terminal devices.

Service that takes you further
The PFREUNDT support staff are available to provide you with expert advice on the phone and by email.

List view transaction data: Detailed and freely definable by you, all information is clearly displayed.

Informative reports
You can create individualised reports and have them automatically generated at regular intervals and sent by email.

Individual infographics
The analysis of your weighing data is also carried out by individualised graphical reports. You define whether these reports are to be created immediately or at regular intervals.
